

SCHULTE

GO NUMBER ONE! GO SCHULTE!

Schulte Flex Arms... Flex Your Mower's MUSCLE!

Are you having trouble seeing what you are mowing with competitive offset arms that are very long? Some over 22' Long front to back?

Is your neck sore because your mower is too far back to see?

Are the hydraulics hard to operate trying to mow on the left side of the road while looking over your left shoulder and running hydraulics with your right hand?

Schulte Flex Arms provide an offset Arm that keeps the mower closer to the tractor - only 10' away and makes visual operation of the mower simple and easy! Schulte Flex Arms only have one tire track to pick up by the mower providing streak free mowing! Schulte Flex Arms are safer because they are designed to mow with the traffic not against it! Schulte Flex Arms make backing up a breeze with our integrated Strut Arm to keep the Arm and Mower Parallel and operate as one unit! Side draft on a Schulte Flex Arm is not a factor due to the fact that one tire of the Flex Arm is on the road holding the mower at a secured location and the mower is only 10' away from the tractor! Try and pull a competitive Arm with 100 HP tractor and you'll see what we mean! Schulte Flex arms only have 2 Gear boxes to service. Competitive arms have up to 4 gearboxes and 12 u-joints to look after. Not much fun!

Please call: 1 (800) 404-6044 or visit schulte.ca for more information on our complete line of Rock Removal Equipment, Rotary Mowers, Snow Blowers,
